Hafiz Muhammad Ahmad

AI/ML Enthusiast & Computer Science Student

Lahore, Pakistan | hafizmuhammadahmad901@gmail.com | linkedin.com/in/hafiz-muhammad-ahmad-a713673b7 | github.com/hafizmuhammadahmad901-spec

SUMMARY

Computer Science student at UET Lahore (2026–2030) with a growing focus on backend development and AI/ML. Builds practical, working projects such as a REST API for business visibility analysis and a role-based console application in C++. Comfortable with Python, C++, C#, and SQL, and currently seeking internships and real-world project opportunities.

EDUCATION

BS Computer Science — University of Engineering & Technology (UET), Lahore

2026 – 2030 (Currently 2nd Semester, Fall 2026)

Relevant coursework: Programming Fundamentals, Object-Oriented Programming (C#), Database Management Systems

Academic achievement: A+ in Information & Communication Technology (ICT)

PROJECTS

Visibility Report API — Python, FastAPI, SQLAlchemy, SQLite, Pytest

Solo project

• Built a backend REST API that analyzes a local business's online visibility from signals such as hours, category, description, contact availability, ratings, reviews, photos, and competitor rating.

• Designed a rule-based scoring engine that generates a structured report: visibility score, evaluation, identified gaps, recommendations, and estimated visibility loss.

• Implemented report storage and retrieval (by ID and list), input validation, error handling, interactive Swagger/OpenAPI docs, and an automated pytest test suite.

Bus Ticket Management System — C++

Solo project

• Developed a console-based, role-driven system (Admin, Manager, Passenger) modeling bus fleet management, seat booking, fare handling, and passenger accounts.

• Implemented admin controls for fleet CRUD operations, fare/status management, and revenue reporting; manager views for fleet and booking summaries; and passenger flows for signup, booking, and profile management.

SKILLS

Programming Languages	Python, C++, C#
Web Development	HTML, CSS
Backend & Frameworks	FastAPI
Databases	SQL, SQLite
Data Science / AI / ML	Pandas, AI/ML Fundamentals
Tools	Git, GitHub, VS Code

ACHIEVEMENTS & LEADERSHIP

• Class Representative — represented and coordinated for classmates.

- Tehsil-Level Debater — competed in debate competitions at the tehsil level.
